## DETAILED ACTION

### *1. Election/Restriction*

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 14-16, drawn to a method of modulating GPCR function, classified in class 435, subclass 7.1.
- II. Claims 12 and 13, drawn to a method of identifying a GPCR antagonist, classified in class 435, subclass 7.2.

B. The inventions are distinct, each from each other because of the following reasons:

Inventions I-II are independent and distinct, each from the other, because the methods are practiced with materially different process steps for materially different purposes and each method requires a non-coextensive search because of different starting materials, process steps and goals.

**Furthermore, in addition to electing a Group, Applicants must further elect a specific GPCR from claim 2 and a (i.e. one) corresponding SEQ ID NO from claim 9 as well as one specific formula from claim 8 (i.e. with X, A, B and Y all defined by a specific structure). It is not clear to what the "(I)" in claim 8 refers. If it refers to a specific structural component of Formula I then "(I)" must be specifically defined by a structure as with X, A, B and Y.**

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
